Introdution

The following is the second document in a series analyzing the 2020 Payroll Tax Deferral Program. In the first document, titled "User_Count", I proposed a classification scheme to determine which workers are eligible for the tax deferral and discussed limitations of the data. This document present preliminary results on the payroll tax deferral.

Covariate Comparison

geom_path: Each group consists of only one observation. Do you need to adjust
the group aesthetic?
